

Blueprint for advanced skills
& trainings in the social economy

The baSE project aims to establish an **alliance for Sectoral Cooperation on Skills for the Social Economy and proximity ecosystem**. baSE involves companies, higher education and Vocational Education and Training (VET) providers, research institutions, social partners, and sector experts.

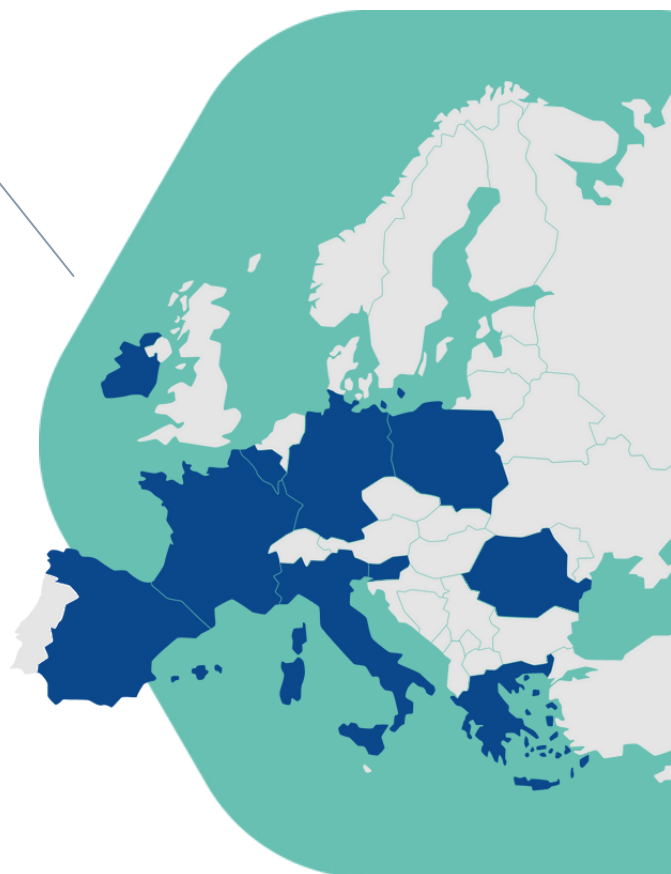

www.socialeconomyskills.eu

The baSE project enables knowledge sharing among all the actors involved, contributing to the ecosystem's growth. It focuses on skills mismatches for upskilling and reskilling of SE practitioners providing new skills for new occupational profiles in the SE sector.

The baSE partnership includes 10 countries

Belgium, France, Germany, Greece, Ireland, Italy
Poland, Romania, Slovenia, Spain

Co-funded by
the European Union

The top of the page features two overlapping hexagonal images. The left hexagon, with a red tint, shows a young man and a young woman smiling and working together at a table with various objects. The right hexagon, with a blue tint, shows three young men in a library or study setting, looking at a book together.
